DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-9, 17-18, 26-29, 37, drawn to broadcasting synthesized image data.

Group II, claim(s) 10, 19, 30, drawn to broadcasting text.

Group III, claim(s) 11, 20, 31, drawn to broadcasting non-image data.

Group IV, claim(s) 12, 21, 32, 36, 38-39, drawn to broadcasting plug-in data.

Group V, claim(s) 13, 22, 33, drawn to broadcasting link address information.

Group VI, claim(s) 14, 23, 34, drawn to broadcasting position information of a pointer.

Group VII, claim(s) 15-16, 24-25, 35, drawn to broadcasting imaged data depicted by operation of the broadcaster on the browser.

2. The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons (as stated in the International Search Report):

No special technical feature within the meaning of PCT Rule 13.2, second sentence (hereinafter, referred to "a special technical feature") common to these groups of inventions can be seen.

The matter common to the aforementioned seven groups relates to live streaming.

However, this matter is not novel (For example, see JP2003-91472A, JP 2003-92806 A. As for claim 27, live streaming is not indicated clearly but considering the combining process, it is classified into the first group of inventions, i.e.; claims.). This matter makes no contribution over the prior art and cannot be a special technical feature.

As for claims 13, 22, 33, claims 14, 23, 34, and claims 15-16, 24-25, 35, there is a common matter relating to output of information on browser in live streaming. However, this matter is not novel, either (for example, see JP 2003-92706 A (for example, paragraph [0094])). This matter makes no contribution over the prior art and cannot be a special technical feature.

Accordingly, claims of this application is divided into the seven groups as has been described above according to the matters which may be special technical features. That is, this application describes the seven groups of inventions in total.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does

not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to RICHARD M. BEMBEN whose telephone number is (571)272-7634. The examiner can normally be reached on 8:30AM-5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Ometz can be reached on (571) 272-7593. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
